

## CONTENTS

1.	The Normal Pituitary Gland . . . . .	1
	Gross Anatomy . . . . .	1
	Vascular Supply . . . . .	4
	Nerve Supply . . . . .	7
	Embryology and Developmental Disorders . . . . .	7
	Microscopic and Functional Anatomy . . . . .	10
	Hypothalamus and Neurohypophysis . . . . .	10
	Adenohypophysis . . . . .	13
	Other Peptides in the Adenohypophysis . . . . .	32
2.	Methods in Pituitary Pathology . . . . .	41
	Gross Examination . . . . .	41
	The Autopsy Pituitary . . . . .	41
	The Surgical Specimen . . . . .	42
	Intraoperative Consultation . . . . .	42
	Histology and Immunohistochemistry . . . . .	43
	Electron Microscopy . . . . .	47
	Tissue Culture . . . . .	48
	Flow Cytometry . . . . .	48
	Molecular Analysis . . . . .	49
	A Practical Approach to the Diagnosis of a Pituitary Tumor . . . . .	49
3.	Pituitary Neuroendocrine Tumors . . . . .	55
	Epidemiology . . . . .	55
	Classification . . . . .	58
	Functional Classification . . . . .	58
	Anatomic or Radiologic Classification . . . . .	58
	Histologic and Immunohistochemical Classification . . . . .	62
	Ultrastructural Classification . . . . .	63
	Clinicopathologic Classification . . . . .	64
	Tumors Causing ACTH Excess . . . . .	65
	Clinical Features . . . . .	65
	Biochemical Findings . . . . .	66
	Radiologic Findings . . . . .	67
	Gross Findings . . . . .	67
	Microscopic Findings . . . . .	68
	Differential Diagnosis . . . . .	75
	Treatment and Prognosis . . . . .	75

*Tumors of the Pituitary Gland*

Tumors Causing Growth Hormone Excess . . . . .	76
Clinical Features . . . . .	76
Biochemical Findings . . . . .	77
Radiologic Findings . . . . .	78
Gross Findings . . . . .	79
Microscopic Findings . . . . .	80
Differential Diagnosis . . . . .	90
Treatment and Prognosis . . . . .	91
Tumors Causing Prolactin Excess . . . . .	92
Clinical Features . . . . .	92
Biochemical Findings . . . . .	94
Radiologic Findings . . . . .	94
Gross Findings . . . . .	95
Microscopic Findings . . . . .	95
Differential Diagnosis . . . . .	105
Treatment and Prognosis . . . . .	106
Tumors Causing Thyrotropin Excess . . . . .	108
Clinical Features . . . . .	108
Biochemical Findings . . . . .	109
Radiologic Findings . . . . .	109
Gross Findings . . . . .	109
Microscopic Findings . . . . .	109
Differential Diagnosis . . . . .	113
Treatment and Prognosis . . . . .	113
Tumors Causing Gonadotropin Excess . . . . .	115
Clinical Features . . . . .	115
Biochemical Findings . . . . .	116
Radiologic Findings . . . . .	116
Gross Findings . . . . .	116
Microscopic Findings . . . . .	116
Differential Diagnosis . . . . .	119
Treatment and Prognosis . . . . .	120
Clinically Nonfunctioning Adenohypophysial Cell Tumors . . . . .	121
Clinical Features . . . . .	121
Biochemical Findings . . . . .	121
Radiologic Findings . . . . .	121
Microscopic Findings . . . . .	121
Differential Diagnosis . . . . .	134
Treatment and Prognosis . . . . .	135

Unusual Plurihormonal and Multiple Tumors . . . . .	135
Clinical Features . . . . .	135
Biochemical Findings . . . . .	135
Radiologic Findings . . . . .	135
Microscopic Findings . . . . .	135
Differential Diagnosis . . . . .	136
Treatment and Prognosis . . . . .	136
Pituitary Apoplexy . . . . .	136
Clinical Features . . . . .	136
Pathogenesis . . . . .	136
Gross and Microscopic Findings . . . . .	136
Differential Diagnosis . . . . .	137
Treatment and Prognosis . . . . .	137
Ectopic Tumors . . . . .	137
Pathogenesis of Pituitary Tumors . . . . .	138
Clonality Studies . . . . .	139
Pituitary Tumor Susceptibility Genes . . . . .	139
Endocrine-Specific Mechanisms: Hormone Regulatory Pathways . . . . .	141
Classic Oncogenic Signals . . . . .	146
Dysregulated Growth Factors and their Receptors . . . . .	147
Epigenetically Silenced Tumor Suppressors in Sporadic Pituitary Tumors . . . . .	148
Epigenetic Alterations in Pituitary Tumors . . . . .	150
Implications for Therapy . . . . .	151
4. Pituitary Carcinoma . . . . .	175
Pathogenesis . . . . .	175
Clinical Features . . . . .	176
Radiologic Findings . . . . .	176
Morphologic Findings . . . . .	176
Treatment and Prognosis . . . . .	181
5. Pituitary Blastoma . . . . .	183
Pathogenesis . . . . .	183
Clinical Features . . . . .	183
Radiologic Findings . . . . .	183
Morphologic Findings . . . . .	183
Treatment and Prognosis . . . . .	186
6. Tumors of the Hypothalamus and Neurohypophysis . . . . .	187
Hypothalamic Hamartoma . . . . .	187
Gangliocytoma and Ganglioglioma . . . . .	189
Neurocytoma . . . . .	194

Paranglioma . . . . .	198
Pituicytoma and its Variants . . . . .	201
Other Sellar Gliomas . . . . .	206
Meningiomas . . . . .	209
Schwannomas . . . . .	211
7. Craniopharyngioma . . . . .	219
Pathogenesis . . . . .	219
Clinical Features . . . . .	219
Biochemical Findings . . . . .	220
Radiologic Findings . . . . .	220
Gross Findings . . . . .	221
Microscopic Findings . . . . .	221
Differential Diagnosis . . . . .	225
Treatment and Prognosis . . . . .	227
Malignant Craniopharyngioma . . . . .	228
8. Germ Cell Tumors . . . . .	231
Clinical Features . . . . .	231
Radiologic Findings . . . . .	231
Biochemical Findings . . . . .	231
Microscopic Findings . . . . .	231
Differential Diagnosis . . . . .	234
Treatment and Prognosis . . . . .	234
9. Hematologic Tumors . . . . .	237
Lymphoma and Leukemia . . . . .	237
Histiocytoses . . . . .	239
10. Mesenchymal and Vascular Tumors . . . . .	247
Chordomas . . . . .	247
Vascular Tumors . . . . .	250
Tumors of Fibrous Tissue, Fat, Bone, and Cartilage . . . . .	250
11. Metastatic Neoplasms . . . . .	255
Epidemiology . . . . .	255
Clinical Features . . . . .	255
Radiologic Findings . . . . .	255
Microscopic Findings . . . . .	255
Differential Diagnosis . . . . .	258
Treatment and Prognosis . . . . .	259
12. Tumor-Like Lesions of the Sella Turcica . . . . .	263
Hyperplasias . . . . .	263
Cysts . . . . .	269

Inflammatory Lesions. . . . .	271
Lymphocytic Hypophysitis . . . . .	272
Idiopathic Granulomatous Hypophysitis . . . . .	278
Xanthomatous Hypophysitis. . . . .	279
IgG4-Related Hypophysitis (Inflammatory Pseudotumor) . . . . .	281
Miscellaneous Tumor-Like Lesions. . . . .	281
Aneurysms . . . . .	281
Meningoencephalocele . . . . .	282
Hamartomas . . . . .	282
Bone Lesions. . . . .	283
Index . . . . .	293
