<b>Preface</b>	<i>xxxiii</i>
<b>List of Contributors</b>	<i>xxxv</i>
<b>1 Introduction</b>	<i>1</i>
<i>I.M. Wright</i>	
Historical Review	<i>1</i>
The Ancient World	<i>1</i>
Middle Ages/Mediaeval Period	<i>2</i>
The Renaissance/Reformation	<i>2</i>
The Enlightenment and Industrial Revolution	<i>2</i>
The Twentieth and Twenty-first Centuries	<i>4</i>
The Future	<i>6</i>
References	<i>7</i>
<b>2 Bone Structure and Function</b>	<i>11</i>
<i>C.M. Riggs and A.E. Goodship</i>	
Introduction	<i>11</i>
Bone Architecture	<i>11</i>
Cellular Components	<i>12</i>
Bone Formation	<i>13</i>
Vascular Supply	<i>14</i>
Innervation	<i>14</i>
Microstructure	<i>15</i>
Ultrastructure	<i>17</i>
Organic Component	<i>18</i>
Inorganic Component	<i>19</i>
Mineralization	<i>19</i>
Function	<i>20</i>
Tissue (Material) Properties	<i>20</i>
Structural (Whole Bone) Properties	<i>23</i>
Adaptation	<i>24</i>
Stress Protection	<i>25</i>
Conclusions	<i>25</i>
References	<i>26</i>
<b>3 Pathophysiology of Fractures</b>	<i>29</i>
<i>J.L. Pye and S.M. Stover</i>	
Material Features of Bone Failure	<i>29</i>
Loading Modes	<i>30</i>
Locally Acting Loading Modes	<i>30</i>
Globally Acting Loading Modes and Resulting Fracture Configurations	<i>30</i>

Tension	30
Compression	31
Torsion	31
Bending	32
Shear	34
Combined Loading	34
Relationships Between Location and Morphology	35
The Mechanical Behaviour of Bone	35
Structural Properties and the Load–Deformation Curve	36
Material Properties and the Stress–Strain Curve	36
The Role of Geometry	37
Viscoelasticity	39
Monotonic and Repetitive Stress Fractures	40
Classifications of Fractures	43
Fracture Topography	43
Completeness	45
Complexity	45
Displacement	45
Contamination	45
Articular Involvement	45
Other Factors	46
References	46
<b>4 Fracture Epidemiology</b>	<b>55</b>
<i>T.D.H. Parkin</i>	
State of Knowledge	55
Geographic, Discipline and Horse Level Incidence	55
Incidence of Fractures Sustained During Competition	55
Thoroughbred Racing	55
Quarter Horse Racing	57
Endurance Riding	57
Eventing	57
Incidence of Fractures Sustained During Training	57
Thoroughbred Training	57
Showjumping Training	58
Measures of Fracture Incidence in Other Horses	58
Risk Factors, Predisposing Factors and Evidence	59
Risk Factors Associated with Training Regimens	59
The Importance of Detailed Information About Horses Under Investigation	61
Predictability and Potential for Effective Screening	62
References	63
<b>5 Imaging Fractures</b>	<b>67</b>
<i>S.M. Puchalski and G.J. Minshall</i>	
Introduction	67
Image Quality	67
Image Interpretation	68
Negative Studies	68
Radiography	69
General Principles	69
Technical Considerations	70
Projections	70
Artefacts and Other Misleading Features	71

Limitations	72
Principles of Interpretation	72
Fracture Types	72
Monotonic Fractures	72
Stress Fractures	72
Articular Fractures	73
Fissure Fractures	73
Avulsion Fractures	73
Compression Fractures	73
Accompanying Features	73
Soft Tissue Swelling	73
Presence of Gas Lucency	73
Monitoring Fracture Healing	74
Ultrasonography	74
General Principles	74
Technical Considerations	74
Transducers	74
Artefacts and Other Misleading Features	75
Limitations	75
Principles of Interpretation	76
Entheses	76
Secondary Features	76
Monitoring Fracture Healing	76
Nuclear Scintigraphy	76
General Principles	76
Technical Considerations	79
Time of Evaluation	79
Patient Preparation	79
Image Acquisition	79
Image Quality	81
Descriptors	81
Quantitative Assessment	81
Qualitative Assessment	82
Clinical Indications	82
Limitations	82
Principles of Interpretation	82
Dorsal Cortex of the Third Metacarpal Bone	82
Enostosis-like Lesions	82
Monitoring Fracture Healing	82
Computed Tomography	84
General Principles	84
Technical Considerations	84
Artefacts	85
Clinical Indications	85
Limitations	86
Principles of Interpretation	87
Magnetic Resonance Imaging	87
General Principles	87
Technical Considerations	88
Clinical Indications	88
Limitations	88
Principles of Interpretation	89
Monitoring Fracture Healing	91

Positron Emission Tomography 91  
References 91

## 6 Bone Healing 97

*C.E. Kawcak*

Introduction and Principles 97  
Phases of Bone Healing 98  
Cellular and Humeral Influences on Bone Healing 101  
Mechanical Influences on Bone Healing 103  
Monitoring Bone Healing 104  
Healing of Stress Fractures 105  
Healing of Incomplete Fractures 106  
Healing of Complete Non-displaced Fractures 106  
Healing of Displaced Fractures 106  
Healing of Reduced and Repaired Fractures 106  
Healing of Repaired But Non-reduced and/or Unstable Fractures 107  
Effects of Internal Fixation on Bone Healing 107  
Effects of External Fixation on Bone Healing 107  
Intrinsic Factors That Affect Healing 108  
Exogenous Factors That Influence Fracture Healing 108  
    Pharmacologic Influences 108  
        Non-steroidal Anti-inflammatory Drugs 108  
        Bisphosphonates 108  
        Antimicrobials 109  
    Biological Techniques 109  
    Bone Grafts 110  
    Synthetic Bone Substitutes 110  
Exogenous Devices 111  
Conclusions 111  
References 112

## 7 Triage and Emergency Care 117

*I.M. Wright and J. Daghli*

Introduction 117  
Racecourse Fractures 117  
Insurance 119  
Clinical Assessment 119  
Clinical Features of Specific Fractures 122  
    Distal Phalanx 122  
    Navicular Bone 122  
    Middle Phalanx 122  
    Proximal Phalanx 122  
    Distal Condyles of the Third Metacarpal and Metatarsal Bones 123  
    Forelimb Proximal Sesamoid Bones 123  
    Transverse and Oblique Fractures of the Diaphysis of the Third Metacarpal and Metatarsal Bones 124  
    Cuboidal Bones of the Carpus 124  
    Carpal Subluxation and Collapsing Carpal Fractures 124  
    Radius 125  
    Ulna 125  
    Humerus 125  
    Scapula 126  
    Tarsus 127

Tarsal Luxation and Subluxation	127
Tibia	127
Stifle Joints	127
Femur	128
Pelvis	128
Sedation	130
Analgesia	131
Radiography	132
Ultrasonography	133
Wounds	133
Principles of Temporary Immobilization	133
Techniques for Temporary Immobilization	134
Robert Jones Bandages	134
Splinted Robert Jones Bandages	135
Bandage Cast	136
Casts	136
Compression Boots	137
Dorsal Splint	139
Flexion Splints	140
Palmar/Plantar Splint	141
Recommended Emergency Support	141
Distal Phalanx and Navicular Bone	141
Middle Phalanx	141
Proximal Phalanx	141
Distal Condyles of the Third Metacarpal/Metatarsal Bones	141
Proximal Sesamoid Bones	142
Diaphyseal Fractures of the Third Metacarpal/Metatarsal Bones	142
Fractures of the Carpus	143
Fractures of the Radial Diaphysis	143
Ulnar Fractures	143
Fractures of the Humerus and Scapula	143
Fractures of the Tarsus	144
Tibial Fractures	144
Fractures Involving the Stifle Joints, Femur and Pelvic Girdle	144
Transport	144
Ambulances	146
Nursing and Supportive Care	146
References	148
<b>8 Surgical Equipment, Implants and Techniques for Fracture Repair</b>	<b>153</b>
<i>J.A. Auer</i>	
Principles	153
Anatomic Fracture Reduction	153
Stable Internal Fixation	153
Preservation of Blood Supply	153
Early, Active Mobilization	153
Pre-operative Planning and Approach to Bone	154
Instruments and Implants	154
Equipment for Internal Fixation	155
Depuy Synthes Instruments	155
Power Drill	155
Large Fragment Set	155

Drill Bits	155
Double Drill Guide	156
Universal Drill Guide	156
Special Drill Guides for Plate Application	156
Drill Guides for Locking Head Screws	157
Countersink	157
Depth Gauge	158
T-Handle	158
Tap	158
Screwdrivers	158
Torque-Limiting Devices	158
Tension Device	159
Push-Pull Device	159
Plate Bending Press	159
Bone Clamps	160
Additional Instruments	160
Screw Types, Sizes and Techniques	160
Cortex Screws	161
Self-tapping Cortex Screws	161
Screws Inserted in Lag Technique	161
Position Screws	164
Plate Screws	164
Cancellous Screws	164
Cannulated Screws	165
Locking Head Screws	165
Headless Screws	165
Screw Removal	165
Intact Screws	165
Stripped Hexagonal Screw Head	166
Broken Screws	166
Plates	167
Dynamic Compression Plates	167
Locking Compression Plates	169
Principles of Plate Fixation	169
Plate Functions and Applications	170
Neutralization Plates	170
Compression Plate	170
Buttress Plates	171
Application of a Dynamic Compression Plate	171
Application of a Locking Compression Plate	171
Human Femoral Locking Compression Plates	174
Veterinary T-LCP	174
Human Distal Femoral Locking Compression Plates	174
Compact 2.4 UniLOCK System	175
Variable-angle Locking Compression Plates	175
Limited Contact Dynamic Compression Plates	176
Dynamic Condylar Screw and Dynamic Hip Screw Implant Systems	176
One-third Tubular Plates	177
Leg Lengthening Plates	177
Intramedullary Implants	177
Steinmann Pins	177

Stacked Pin Fixation	179
Rush Pins	179
Interlocking Intramedullary Nails	180
Wire and Cable	181
Orthopaedic (Cerclage) Wire	181
Cables	181
Reduction Devices	181
Fragment Distractor	181
Aiming Devices	182
Equine Aiming Device	182
Notes	183

## **16 Fractures of the Distal Phalanx 331**

- D.W. Richardson*
- Anatomy 331
- Fracture Types 331
- Incidence and Causation 333

Clinical Features and Presentation	333
Imaging and Diagnosis	334
Acute Fracture Management	335
Treatment Options and Recommendations	335
Specific Management Techniques	336
Type 1 (Non-articular Wing) Fractures	336
Type 2 (Articular Wing) Fractures	336
CT-Guided Lag Screw Fixation	337
Post-operative Care and Convalescence	340
Type 3 (Mid-sagittal) Fractures	341
Screw Size	341
Screw Position	341
Screw Number	342
Lag Screw Fixation Technique	342
Type 4 (Extensor Process) Fractures	346
Fragment Removal	346
Repair	346
Type 5 (Complex and Transverse) Fractures	347
Type 6 (Solar Margin) Fractures	347
Type 7 Fractures	348
Results	348
References	348

## **17 Fractures of the Navicular Bone 351**

*M.R.W. Smith*

Anatomy 351

Fracture Incidence and Aetiology 351

  Parasagittal Fractures 351

  Transverse Fractures 352

  Frontal Plane Fractures 352

  Fractures of the Sloping Border 352

  Distal Border Fragments 352

  Bipartite and Tripartite Bones 353

Parasagittal Fractures 353

  Presentation and Diagnosis 353

  Conservative Management 355

  Surgical Repair 355

    Pre-operative Planning 357

    Surgical Preparation 357

    Computed Tomographic Imaging 357

    Surgical Technique 357

    Post-operative Care 360

    Outcome 361

    Complications 361

Fragment Removal 362

Palmar/Plantar Digital Neurectomy 362

References 362

## **18 Fractures of the Middle Phalanx 365**

*J.P. Watkins and K.G. Glass*

Anatomy 365

Fracture Types 365

Osteochondral Chip Fractures of the Proximal Articular Surface 366

Incidence and Causation	366
Clinical Features and Presentation	366
Imaging and Diagnosis	366
Treatment Options and Recommendations	366
Techniques for Treatment	366
Results	368
Axial Fractures	369
Incidence and Causation	369
Clinical Features and Presentation	369
Imaging and Diagnosis	369
Acute Fracture Management	369
Treatment Options and Recommendations	369
Techniques for Treatment	369
Results	369
Fractures of the Palmar/Plantar Eminences	370
Incidence and Causation	370
Clinical Features and Presentation	370
Imaging and Diagnosis	371
Acute Fracture Management	371
Treatment Options and Recommendations	371
Techniques for Treatment	372
Proximal Interphalangeal Arthrodesis	372
Surgical Technique	374
Results	376
Comminuted Fractures	377
Incidence and Causation	377
Clinical Features and Presentation	378
Imaging and Diagnosis	378
Acute Fracture Management	378
Treatment Options and Recommendations	379
Techniques for Treatment	380
Results	383
Fractures of the Distal Articular Surface	385
References	386
<b>19 Fractures of the Proximal Phalanx</b>	<b>389</b>
<i>M.R.W. Smith</i>	
Anatomy	389
Fracture Types	389
Fragmentation of the Dorsoproximal Articular Margin	390
Short Incomplete Parasagittal Fractures	390
Long Incomplete Parasagittal Fractures	390
Complete Parasagittal Fractures	390
Comminuted Fractures	392
Dorsal (Frontal) Fractures	392
Fractures of the Palmar/Plantar Processes	393
Fragmentation of the Distal Articular Margin	394
Distal Articular Fractures	394
Salter–Harris Fractures	394
Incidence and Causation	395
Epidemiology	395

Aetiopathogenesis	396
Clinical Features and Presentation	396
Imaging and Diagnosis	397
Acute Fracture Management	398
Treatment Options and Recommendations	398
Short Incomplete Parasagittal Fractures	398
Long Incomplete Parasagittal Fractures	400
Surgical Repair – Dorsal Screw Configuration	400
Surgical Repair – Triangular Screw Configuration	401
Standing Fracture Repair	402
Complete Parasagittal Fractures	402
Moderately Comminuted Fractures	403
Minimally Invasive Repair	403
Open Reduction and Internal Fixation	404
Highly Comminuted Fractures	405
Long Frontal Plane Fractures	406
Short Dorsoproximal Dorsal (Frontal) Plane Fractures	407
Fractures of the Palmar/Plantar Processes	407
Distal Joint Fractures	408
Salter–Harris Fractures	408
Results	408
Short Incomplete Parasagittal Fractures	409
Long Incomplete Parasagittal Fractures	409
Complete Parasagittal Fractures	409
Comminuted Fractures	410

### **23 Fractures of the Second and Fourth Metacarpal and Metatarsal Bones 501**

<i>D.W. Richardson and K.F. Orved</i>	
Anatomy	501
Fracture Types	501
Incidence and Causation	501
Clinical Features and Presentation	502
Imaging and Diagnosis	502
Treatment	502
Proximal Fractures	502
Medical Management	503
Surgical Debridement	503
Internal Fixation	504
Ostectomy of Mt4	505
Mid-Diaphyseal Fractures	506
Medical Management	506
Surgical Management	507
Distal Fractures	509
References	510

### **24 Fractures of the Carpus 511**

<i>C.W. McIlwraith</i>	
Anatomy	511
Osteochondral Chip Fractures (Fragments) of the Dorsal Articular Margins	512
Incidence and Location	512
Clinical Signs	513
Pathogenesis	513
Treatment	515
Surgery	515
Post-operative Care	517
Results	519
Arthroscopic Surgery for the Repair of Carpal Chip Fractures	520
Avulsion Fragments Associated with the Palmar Intercarpal Ligaments	521
Osteochondral Fragments in the Palmar Compartments of the Carpal Joints	521
Incidence and Diagnosis	522
Treatment	522
Results	523
Carpal Slab Fractures	523
Incidence	523
Diagnosis	524
Treatment	524
Surgery	526
Frontal Plane Slab Fracture of the Radial Facet of the Third Carpal Bone	526
Frontal Plane Slab Fractures of the Intermediate Facet of the Third Carpal Bone	529
Frontal Plane Slab Fractures of Radial and Intermediate Facets of the Third Carpal Bone	529
Comminuted Collapsing Fractures	530
Sagittal Fractures of the Third Carpal Bone	534

Sagittal Slab Fractures of Other Carpal Bones	535
Frontal Plane Slab Fractures of Other Carpal Bones	535
Post-operative Care and Results	536
Accessory Carpal Bone Fractures	538
Diagnosis	539
Treatment	540
References	540

## 25 Fractures of the Radius 545

<i>A.J. Ruggles</i>	
Anatomy	545
Fracture Types and Causation	545
Clinical Features and Presentation	546
Imaging and Diagnostics	546
Acute Fracture Management	547
Treatment Options and Recommendations	547
Fissure Fractures	547
Repair of Simple Diaphyseal Fractures	547
Implant Selection	547
Surgical Techniques	549
Physeal Fractures	550
Proximal Radius	551
Distal Radius	551
Post-operative Management	553
Results	554
References	554

## 26 Fractures of the Ulna 557

<i>I.M. Wright</i>	
Anatomy	557
Incidence	558
Aetiology	558
Fracture Types and Classification	558
Clinical Signs	562
Radiography and Radiology	563
Emergency Care	563
Treatment Options and Recommendations	565
Conservative Treatment	565
Fracture Repair	566
Principles and Surgical Approach	566
Locking Compression Plate Repair	569
Fixation of the Ulna to the Radius in Foals	570
Repair of Apophyseal Avulsion (Type 1a) Fractures	571
Repair of Salter-Harris Type II (Type 1b) Fractures	571
Simple Humero-ulnar Articular (Type 2) Fractures	572
Fractures Commencing at or Distal to the Radio-ulnar Articulation (Type 5 Fractures)	574
Comminuted (Type 4) Fractures	575
Open Fractures	579
Repair with Wire	579
Fractures with Cubital Luxation	580
Fragment Removal	580
Recovery from Anaesthesia	580

Post-operative Care and Convalescence	580
Results	581
Apophyseal Avulsions	581
Salter–Harris Type II Fractures	581
Proximal Non-articular (Type 3) Fractures	582
Simple Humero-ulnar Articular Fractures	582
Comminuted Articular Fractures	582
Fractures Commencing at or Distal to the Radio-ulnar Articulation	582
Open Fractures	582
References	583

## **27 Fractures of the Humerus** 585

*J.P. Watkins and K.G. Glass*

Anatomy	585
Fractures of the Greater Tubercle	586
Incidence and Causation	586
Clinical Features and Presentation	586
Imaging and Diagnosis	586
Acute Fracture Management	587
Non-surgical Treatment	588
Surgical Treatment	588
Post-operative Care	589
Results	590
Fractures of the Deltoid Tuberosity	590
Treatment and Results	590
Stress Fractures	591
Incidence and Causation	591
Clinical Features and Diagnosis	591
Treatment and Results	593
Physal Fractures	594
Diaphyseal Fractures	595
Incidence and Causation	595
Clinical Features and Presentation	595
Imaging and Diagnosis	595
Acute Fracture Management	595
Treatment Options and Recommendations	597
Conservative Management	597
Surgical Management	598
Results	600
References	600

## **28 Fractures of the Scapula** 603

*D.W. Richardson and K.F. Ortvad*

Anatomy	603
Fracture Types	603
Incidence and Causation	603
Clinical Features and Presentation	604
Imaging and Diagnosis	604
Radiography	604
Ultrasonography	605
Nuclear Scintigraphy	605
Treatment	605

Supraglenoid Tubercle Fractures	605
Complete Fractures of the Scapular Neck or Body	607
Fractures of the Scapular Spine	607
References	610

## 29 Fractures of the Tarsus 611

*I.M. Wright*

Anatomy	611
Fractures of the Tarsal Bones	613
Fractures of the Medial Malleolus of the Tibia	613
Fractures of the Lateral Malleolus of the Tibia	615
Fractures of the Distal Intermediate Ridge of the Tibia	618
Sagittal Fractures of the Talus	618
Fractures of the Trochlear Ridges of the Talus	619
Fractures of the Medial Tubercles of the Talus	621
Other Fractures of the Talus	621
Fractures of the Calcaneus	621
Fractures of the Central Tarsal Bone	628
Fractures of the Third Tarsal Bone	631
Fractures of the Proximal Third Metatarsal Bone	635
Other Tarsal Fractures	636
References	637

## 30 Fractures of the Tibia 641

*D.W. Richardson and K.F. Ortvad*

Anatomy	641
Fracture Types	641
Incidence and Causation	646
Clinical Features and Presentation	646
Imaging and Diagnosis	647
Radiography	647
Nuclear Scintigraphy	648
Computed Tomography	648
Treatment	648
Proximal Physeal Fractures	648
Distal Physeal Fractures	654
Fractures of the Tibial Tuberosity	654
Diaphyseal Fractures	655
Incomplete Fractures	661
Stress Fractures	661
Fractures of the Medial Eminence	661
Caudal Cruciate Avulsion Fractures	662
References	662

## 31 Fractures of the Patella 665

*K.F. Ortvad and I.M. Wright*

Anatomy	665
Fracture Types	666
Incidence and Causation	666
Clinical Features and Presentation	666
Imaging and Diagnosis	667
Radiography	667

Ultrasonography	667
Treatment	667
Subtotal Patellectomy and Removal of Intra-Articular Fragments	668
Repair of Parasagittal Fractures	673
Transverse Fractures	675
Extra-articular Fragmentation	677
References	677

## **32 Fractures of the Femur** 679

*J.P. Watkins and K.G. Glass*

Anatomy	679
Proximal (Capital) Physeal Fracture	679
Incidence and Causation	679
Clinical Features and Presentation	680
Imaging and Diagnosis	680
Acute Fracture Management	680
Treatment Options and Recommendations	681
Surgical Techniques	681
Results	683
Diaphyseal Fractures	684
Incidence and Causation	684
Clinical Features and Presentation	684
Imaging and Diagnosis	684
Acute Fracture Management	685
Treatment Options and Recommendations	685
Surgical Techniques	686
Results	688
Distal Physeal Fractures	688
Incidence and Causation	688
Clinical Features and Presentation	688
Imaging and Diagnosis	688
Acute Fracture Management	689
Treatment Options and Recommendations	689
Surgical Techniques	689
Results	691
Fractures of the Third Trochanter	691
Incidence and Causation	691
Clinical Features and Presentation	691
Imaging and Diagnosis	692
Acute Fracture Management	692
Treatment Options and Recommendations	692
Results	692
Fractures of the Supracondylar Tuberosity/Gastrocnemius Muscle Avulsion	692
Incidence and Causation	692
Clinical Features and Presentation	692
Imaging and Diagnosis	693
Acute Fracture Management	693
Treatment Options and Recommendations	693
Results	693
Fractures of the Trochlear Ridges	693
Fractures of the Femoral Condyles	693

Avulsion Fractures of the Cranial Cruciate Ligament 694  
References 694

### **33 Fractures of the Pelvis 697**

*R.C. Pilsworth and P.H.L. Ramzan*

Anatomy and Biomechanics 697

Fracture Types, Incidence  
and Causation 698

Clinical Features and Presentation 698

Fractures of the Tuber Coxae 699

Fractures of the Iliac Wing 700

Fractures of the Iliac Shaft 700

Fractures of the Ischium 700

Pubic Fractures 701

Risk Factors Associated with Pelvic Fractures 701

Age 701

Sex 701

Track Surface 701

Other Risk Factors 702

Imaging and Diagnosis 702

Ultrasonography 702

Scintigraphy 705

Radiography 706

Computed Tomography 707

Treatment Options and Recommendations 707

Displaced Open Fractures 707

Delayed Emergence of the Parent Fracture Bed 708

Iliac Wing Fractures 709

Case Selection and Management 709

Pain Control 709

Prevention of Displacement 710

Prevention of Pleuropneumonia 710

Prevention of Laminitis 710

Prevention of Colic 710

Potential of Problems with Parturition 711

Prevention of Injury on Return to Training 711

Results 711

Iliac Wing 712

Iliac Shaft 712

Tuber Coxae 712

Tuber Ischium 712

Ventral Pelvis and Acetabulum 713

### **34 Fractures of the Vertebrae and Sacrum 715**

*F. Rossignol*

Introduction 715

Fractures of the Axial Dens with Atlantoaxial Subluxation 715

Anatomy 715

Incidence and Causation 716

Clinical Features and Presentation 717

Imaging and Diagnosis 717

Acute Fracture Management	717
Treatment Options and Recommendations	717
Ventral Atlantoaxial Fusion Using an LCP	718
Other Techniques	718
Results	718
Atlantoaxial Subluxation	719
Incidence and Causation	719
Clinical Features and Presentation	719
Imaging and Diagnosis	719
Treatment Options and Recommendations	719
Dorsal Laminectomy	719
Results	719
Complete Ventral Luxation of the Axis	720
Incidence and Causation	720
Clinical Features and Presentation	720
Imaging and Diagnosis	720
Treatment Options and Recommendations	720
Fractures of the Atlas	720
Fractures of the Axis	721
Fractures of Cervical Vertebrae 3 to 7	722
Anatomy	722
Fracture Types, Incidences and Causation	722
Clinical Features and Presentation	723
Imaging and Diagnosis	723
Acute Fracture Management	725
Treatment Options and Recommendations	725
Plate Fixation	726
Dorsal Laminectomy	730
Results	731
Fractures of Thoracolumbar Vertebrae	732
Anatomy	732
Fractures Types, Incidence and Causation	732
Clinical Features and Presentation	732
Imaging and Diagnosis	732
Acute Fracture Management	733
Treatment Options and Recommendations	733
Surgical Stabilization in Foals	733
Fractures of the Spinous Processes	733
Fractures of the Sacrum	734
Anatomy	734
Incidence and Causation	734
Clinical Features and Presentation	734
Imaging and Diagnosis	734
Treatment Options and Recommendations	734
Technique and Results	735
Fractures of the Coccygeal Vertebrae	735
References	735

### **35 Fractures of the Ribs** 739

*D.G. Levine*

Anatomy 739

Fracture Types 739

Incidence and Causation	739
Clinical Features and Presentation	740
Imaging and Diagnosis	740
Treatment Options and Recommendations	741
Conservative Treatment	741
Foals	741
Adults	742
Fracture Fixation	742
Approach	742
Plating	743
Nylon Cable (Zip Tie)	744
Securos Cranial Cruciate Ligament Repair System™ and Similar Suturing Techniques	744
Pins and Wires	745
Results	745
References	746

### **36 Fractures of the Head** 747

<i>A.E. Fürst</i>	
Introduction	747
Anatomy	747
Cerebral Cranium	747
Visceral Cranium	747
Mandible	748
Clinical Signs	749
Clinical Examination	749
Treatment Principles	749
Pre-operative Management	749
Surgical Considerations	750
Post-operative Management	750
Complications	751
Fractures of the Cerebral Skull	751
Examination	751
Clinical Signs	751
Acute Treatment and Medical Management	751
Surgical Treatment	753
Prognosis	753
Fractures of the Facial Skull	753
Surgical Approach	755
Reduction	755
Fixation	756
Fragment Interdigitation	756
Polydioxanone Sutures	756
Orthopaedic (Cerclage) Wire Sutures	756
Rosettes (FlapFix)	756
Plates	757
Skin Closure	757
Post-operative Care	757
Fractures of Incisive, Frontal, Nasal and Maxillary Bones	758
Orbital Fractures	759
Outer Parts of the Orbit	759
Inner Part of the Orbit	762
Fractures of the Mandible	762

Surgical Planning and Preparation	764
Wound Management	764
Post-operative Care	764
Surgical Techniques	764
Intraoral Wire	764
Cable Fixation	765
Screws and/or Plates	765
U-shaped Splint	767
Polymethylmethacrylic Compounds	768
External Fixators	768
Pinless Fixator	769
Individual Fracture Locations and Configurations	769
Pars Incisiva	769
Symphysis of the Mandible in Young Horses	769
Premaxilla	769
Interdental Space	771
